

PEDAL POWER

A revolution is quietly unfolding with the increasing popularity of e-bikes and e-trikes. These modern marvels combine the benefits of traditional cycling with electric assistance, making physical activity more accessible and enjoyable for a wider range of people. Great not just as a sustainable solution to the daily commute, e-bikes are also a dynamic way to enhance cardiovascular health, build muscle strength, and improve overall wellbeing. Whether you're a seasoned cyclist looking for a new challenge or someone seeking a fun and effective way to stay active, our top picks of electric rides provide a versatile fitness solution that caters to all levels of ability.

We love the **Jorvik Elite Electric Folding Tricycle JET-E** (from £2,699, jorviktricycles.com) as it provides all the benefits of an e-bike but with the stability of three wheels. Designed for ease and practicality, the foldable frame is compact and easily transportable. Offering a max speed of 15.5mph and a 30-35-mile battery range, the JET-E helps users to adventure confidently and sustainably. This e-trike also includes a clear display screen for riders to monitor speed and battery level, and a lockable, removable battery that will charge from flat to full in just six hours. Available in six colours.

The best-selling model from Cowboy, **Cruiser** (from £2,999, uk.cowboy.com) provides its most upright and relaxed “Dutch” riding position to date, providing improved posture and increased visibility on the road. It features comfort grips on a distinctive raised and curved handlebar to facilitate a natural hand position. In addition, a new wider saddle with larger seating surface is included, plus increased gear ratio to enable a more relaxing ride.

The **Kensington** (from £1,999, voltbikes.co.uk) is the award-winning British Manufacturer VOLT's most stylish e-bike, built for comfort and elegance; its 15- or 17-inch step-through frame suits riders of all heights. Available in light blue and lavender, it comes with a Panasonic battery that covers up to 60 miles on one charge, with suspension in the seat post for a comfortable ride.

With all the style of the original plus electrically powered pedal assistance, the **Pendleton Somerby E-Bike** (£1,099, halfords.com) guarantees effortless rides, making it easy to tackle any hill. With relaxed handlebars, stylish grips, and a deep-padded saddle, it has been designed for ultimate comfort.

The **Brompton Electric P-Line Urban** (£2,270, brompton.com) is a super-light, foldable bike perfect for city or country rides. With power-assisted pedals, a 4-speed gear system, and impressive suspension, it offers smooth, stylish commuting and exploration. Lightweight and easy to transport, it combines vintage charm with modern engineering.

Fiido's C11 bike (£939, uk.fiido.com) is a step-through electric bike that enables riders to carry heavy and large loads when on a long journey. There is the option to install a front basket rack and additional accessories, but it comes with a rear pannier rack and 500Wh removable battery. This long-range e-bike has an impressive range of up to 90km, giving you the freedom to explore further than ever before and the waterproof rating IP54 makes it perfect for UK riding.
